Financial Indicators

1. Introduction

The purpose of this Long Term Financial Plan (“LTFP”) is to express, in financial terms, the activities that the District Council of Mount Remarkable (“Council”) proposes to undertake over the medium to longer term to achieve its stated objectives as outlined in its Strategic Management Plan.

It is a guide for future action based on the longer-term impact of revenue and expenditure proposals. The identification of expected future expenditure and revenue enables the financial implications on Council’s financial sustainability to be readily identified and if warranted, for proposed future activities to be revised.

Long-term financial plans are particularly important for local governments as they are responsible for managing a high level of long-lived assets relative to their income base. A council may have long-periods with modest levels of asset renewal requirements and then other periods when very significant outlays are necessary. All councils need to generate revenue in an equitable manner over time and ensure they have capacity to finance peaks in asset management and other outlays when, and including by way of borrowings where necessary.

The preparation of a LTFP generates improved information to guide decisions about the mix and timing of outlays on operating activities and new and renewal of assets and the funding implications of these. Without a soundly based LTFP, an organisation with significant asset management responsibilities is unlikely to have sufficient data to determine sustainable service levels and affordable asset stockholding strategies, appropriate revenue targets or optimal treasury management.

2. Key assumptions

The following assumptions have been built into the forecast calculations:

- Average CPI forecast of 3.5%;
- Contractor annual increases at 0.2% above CPI;
- Wage annual increases at 3.5% including increases to superannuation contributions
- General Rate Revenue increases of 6.5% above CPI for Years 1, 2 and 3, followed by increases of 2.0% above CPI for the remainder of the plan;
- Capital and maintenance costs are based on the expenditure requirements from the draft Asset Management Plan, noting the estimated value for 2032-33 as per item 3 below;
- Commonwealth Financial Assistance Grant and Roads to Recovery funding has been included throughout the life of the plan, based on the current program allocation, indexed by 1%; and
- The 2023-24 Budget forms year 1 of this LTFP.

This version of the LTFP does not include or consider the financial impacts relating to:

- Growth in the number of rateable properties or capital values
- Outcomes from Service Level and Range Reviews
- Results of future Enterprise Bargaining Agreements

3. Draft Asset Management Plans

The draft Asset Management Plans were provided to the community for consultation along with the draft Long Term Financial Plan. Asset Management Plans are 'living documents' which require updating following changes to condition of assets, adjustments to service levels and asset revaluations. A revaluation of Council's assets is scheduled for 2023-24 for Transportation assets, and 2024-25 for other categories of assets. Revaluations are required every 5 years in accordance with Council's Asset Accounting Policy.

The level of capital expenditure in the current draft Asset Management Plans has been incorporated within the LTFFP, with future years indexed by a CPI forecast. However, the draft AMP was prepared to the 2031-32 year, therefore to allow completion of the ten year LTFFP, an average of the capital expenditure on renewal of assets across the life of the AMP has been included for the 2032-33 year.

4. Financial Indicators

The financial sustainability evaluation of a Council is undertaken with reference to a properly developed and complete LTFFP. The financial plan includes the forecast achievement of projected performance against agreed financial sustainability targets. By achieving these targets Council can claim to be operating in a financially sustainable manner.

In order to demonstrate that the financial strategies above are being achieved, Council needs to monitor the operating surplus ratio.

Further to this, two additional ratios will be reported on to demonstrate that assets are being replaced in line with the requirements of Council's asset data systems whilst maintaining sensible debt levels. These ratios are:

Net financial liabilities ratio
Asset renewal funding ratio

Refer to Appendix A – 'Key Financial Indicators' for the data used to populate the following graphs.

4.1 Operating Surplus Ratio (OSR)

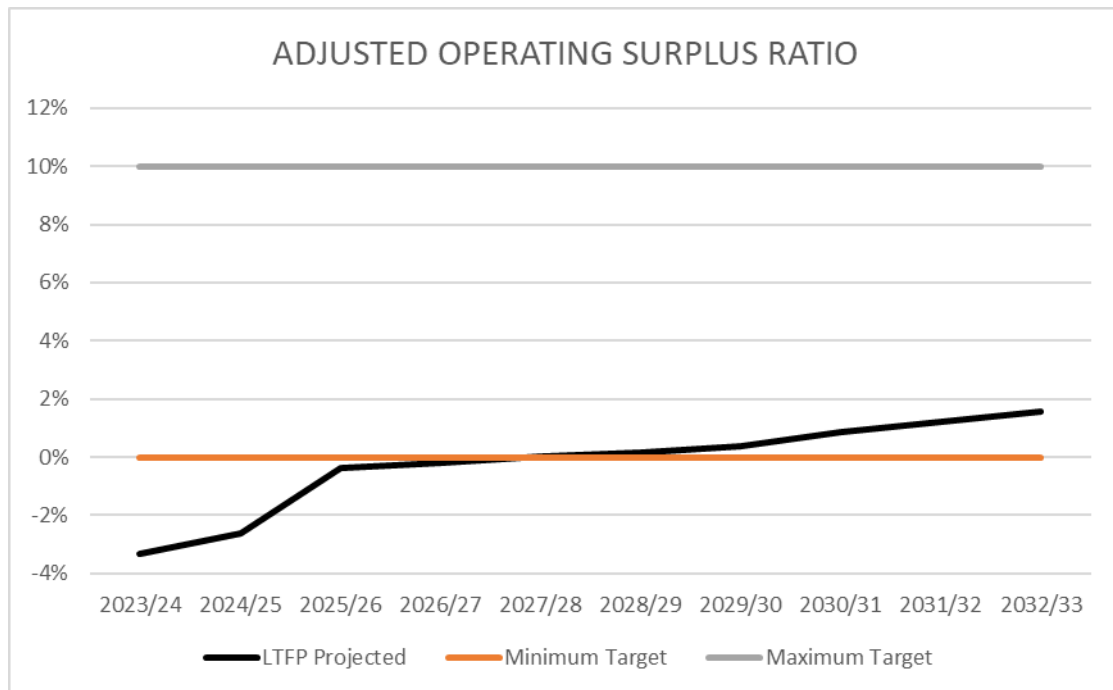

The operating surplus ratio expresses the operating surplus (deficit) as a percentage of total operating revenue.

The ratio is calculated as:

$$\frac{\text{Operating Revenue less Operating Expense}}{\text{Total Operating Revenue}}$$

The OSR is used to determine whether a Council can cover its operating expenditure and depreciation charge from its operating revenue. A positive ratio indicates that operating income is available to help fund proposed capital expenditure. A negative ratio indicates that an increase in operating income or a decrease in operating expenses (or a combination of both) is required to achieve a break-even operating result. Ideally, councils should target breakeven or a small surplus position, with the LGA recommending a target range of 0-10% for this financial indicator.

For the District Council of Mount Remarkable, an adjusted ratio has been provided to remove the LRCIP funding amount from the 2023-24 year and provide an underlying ratio result for comparison. The LTFP for the Council reports a negative OSR until 2027-28, with a positive result maintained from 2028-29 onwards. This result is contingent on increases to general rates to strengthen the Council’s operating position and achieve and maintain a break-even position.

4.2 Net Financial Liabilities Ratio (NFLR)

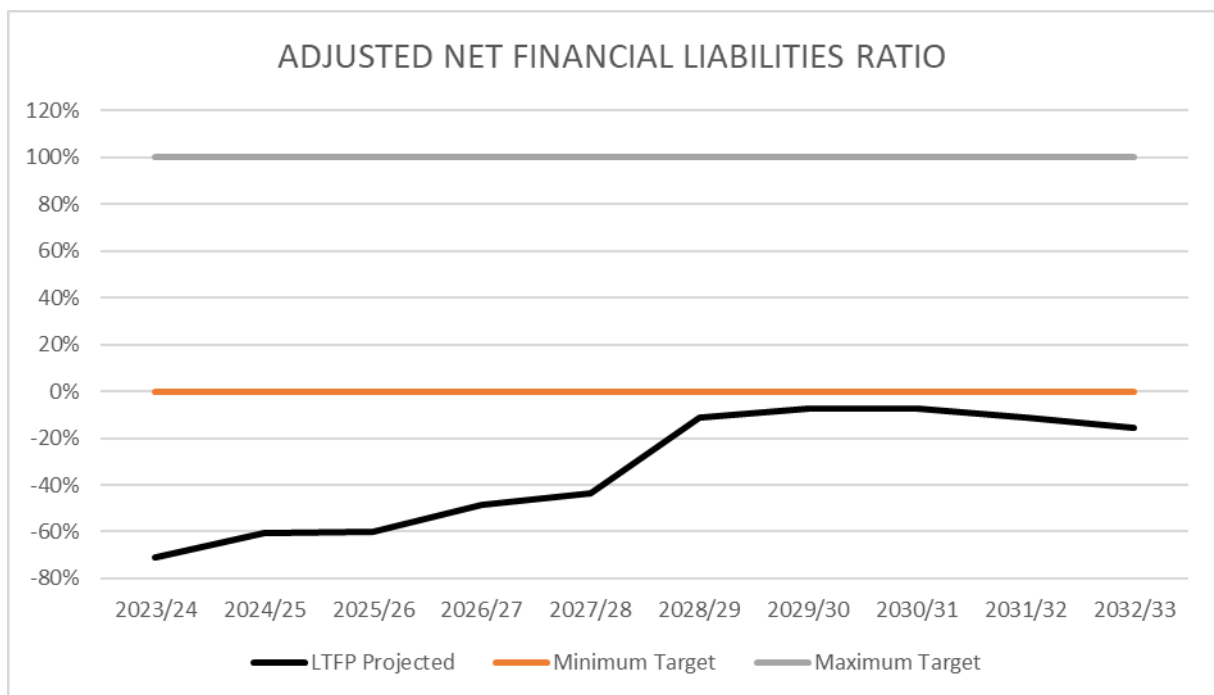

The net financial liabilities ratio shows Council’s net financial liabilities at the end of a financial year as a percentage of operating income for the year.

This ratio is calculated as:

$$\frac{\text{Net Financial Liabilities}}{\text{Total Operating Revenue}}$$

If the ratio falls, over time, this indicates that the Council’s capacity to meet its financial obligations from operating income is strengthening. The LTFP target for the Net Financial Liabilities Ratio, as recommended by the LGA, is greater than 0% but less than 100%.

For the District Council of Mount Remarkable, an adjusted ratio has been provided to remove the LRCIP funding amount from the 2023-24 year and provide an underlying ratio result for comparison. The NFLR for the Council remains as a negative percentage for the life of the plan, meaning that the Council is able to meet its financial obligations from its annual operating revenue.

4.3 Asset Renewal Funding Ratio (ARFR)

This ratio indicates the extent to which existing infrastructure assets are being renewed and replaced, compared with the asset renewal and replacement expenditure identified as required in the Councils Infrastructure and Asset Management Plans.

This ratio is calculated as:

$$\frac{\text{Expenditure on renewal/replacement of assets}}{\text{Expenditure identified in asset management plans}}$$

Expenditure identified in asset management plans

If capital expenditure on renewing or replacing existing assets is at a level consistent with that proposed in soundly prepared IAMPs (i.e. that is based on long-run affordable service levels) then it is likely that a Council is reasonably optimising timing of asset renewal activity. The LTFP target for the Asset Renewal Funding Ratio, is between 90% and 110%, as recommended by the Local Government Association of SA.

The District Council of Mount Remarkable has incorporated capital renewal expenditure levels from it's draft Asset Management Plans into the Long Term Financial Plan. The 2023-24 budget includes additional renewal capital works above what is projected in the Asset Management Plan.

5. Chief Executive Officer's Financial Sustainability Statement

Over the past few years, Council has been collecting and refining data on its infrastructure assets. This has included developing a 10-year asset management plan. The most recent data shows that the depreciation of these assets has increased by approximately \$0.5 million per year. This is a significant financial burden for Council.

While the 2023-24 Annual Budget shows a surplus, this includes a one-off external Federal Government grant. Without this grant the underlying deficit is \$280,200.

To achieve long-term financial sustainability, Council will need to consider its current service level standards and income from rates. Council is currently providing a service level standard that is in excess of what it can afford based on its current asset base and income.

Over the coming 12 months, Council will undertake a full asset revaluation. This will provide an up-to-date and accurate understanding of existing assets and a more reflective depreciation expense. The finalisation of asset management plans in all asset classes will also give a greater definition of what is required with respect to annual depreciation expenses and operating maintenance costs (service level standards). This process could, however, result in a depreciation expense greater than what is currently recognised.

Council has made significant improvements in its financial management in recent years, including improved efficiencies and a reduction in expenses (primarily wages). To achieve long-term financial sustainability, Council will need to focus on reviewing its service level standards (through asset management plans) and ensuring that its assets are being fully utilised. It is also proposed that Council consider rate increases above CPI for the forthcoming years to accelerate achieving financial sustainability and therefore an equitable position for both current and future generations of the community.

Sam Johnson OAM
Chief Executive Officer
