Council Commits to Developing The Bluff

After years in the making, the District Council of Mount Remarkable has reached a point in which Council has resolved to deliver The Bluff at Wirrabara.

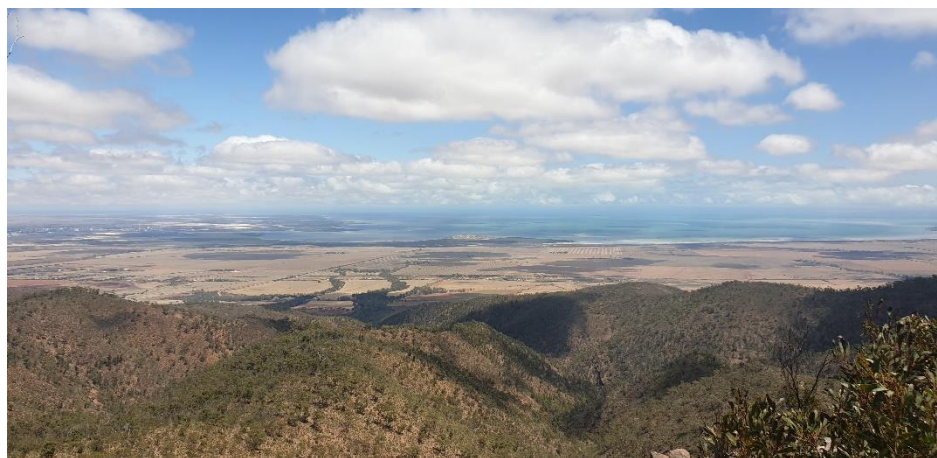

“The people of Wirrabara and the surrounding area have been longing for this moment. Having been struck by disaster by the Bangor fires, The Bluff has been seen as one project in which to give stimulus and growth back to the immediate area” said Mayor Heaslip.

The Bluff project is a unique tourism based project that will allow members of the public to travel to the top of the Southern Flinders in the Wirrabara Forest area by road, in which reaching the top an appropriate viewing platform will be available for people to view one of the most awe-inspiring views of the region.

“The experience is priceless, and every time I take someone to The Bluff to see the view, they are speechless. Most recently I had the pleasure of taking Tony Modra and his family to The Bluff, and their facial expressions said it all” said Mayor Heaslip.

Council has engaged an appropriate contractor after completing an open tender process for the construction of the access road and viewing platform.

Council is aiming for a completion of the project by the end of June 2021, of which an appropriate official opening will be scheduled in time for the peak tourism season of the broader Council area.
